### Claims 1 to 4

A comparison of the inventions that are set forth in claims 1 to 4 and the invention that is disclosed in document 1 shows that with the exception of the feature in the inventions that are set forth in claims 1 to 4 wherein the rear side channel signals among the surround sound signals are reflected off of the sound reflection positions on the walls and the ceiling, etc., so as to then form beams of sound which reach the rear side of the listener, the inventions that are set forth in claims 1 to 4 are the same as the invention that is disclosed in document 1.

Meanwhile, array speakers with a configuration such that sound signals are reflected off of the walls and the ceiling so as to form beams of sound which reach the rear side of the listener are disclosed in document 2.

Therefore, it would have been possible to invent
